

YOUMARES 2019 10

conference for young marine researchers

YOUMARES 10 – THE OCEANS: Our Research, Our Future

11th to 13th of September 2019

NORDAKADEMIE Graduate School, HAMBURG

The YOUMARES (conference for YOUng MARine RESearchers) is celebrating its tenth anniversary this year in Hamburg.

YOUMARES is a scientific conference for Bachelor, Master, and PhD students, those who want to study marine sciences and those who already finished. The wide range of topics and interdisciplinary character is one of the most important aspects of YOUMARES but the easy-to-talk-to setting is what makes it special.

This year we aim to broaden the range of topics covering more aspects of **Blue Growth** and **Economy** such as **Aquaculture**, **Fisheries** and **Marine Biotechnology**, but also **Marine Pollution** and **Climate Change**. With this year's theme "**The Oceans: Our Research, Our Future**" we look forward to a cheerful and inspiring conference with you working in various scientific fields and marine regions of the world.

The "Science meets Economy" evening will give further possibilities for young researchers, companies and scientific institutions to network and exchange.

CALL FOR ABSTRACTS:

You want to present your research at the YOUMARES 10 in Hamburg? Send us your CV and an abstract of your research until July 31st to abstract@youmares.org

All information on oral and poster presentations and the submission guidelines can be found here: <https://www.youmares.org/submission-guidelines/>
